

VALVOLE PER L'ARIA RIBASSATE - VPB

Shortened air valves

Nuove valvole ribassate dagli ingombri ridotti.

Impiegate per compensare il vuoto nella fase di uscita del particolare da cavità profonde o per l'estrazione dei particolari stampati. Sono interamente realizzate in acciaio 1.2083, rettificate e temperate.

New shortened valves that take up minimum space.

These are used to balance air in the vacuum during the extraction phase or to let it into the deep cavities. Completely made in 1.2083 steel, they are ground and hardened and include a self-locking nut.
